How your family finds each other when phones fail

1. **Text first.** Texts often get through when calls don't. Keep messages short.
2. **Out-of-town contact.** One person outside your area everyone checks in with.
3. **Paper card.** Write key numbers on a wallet card for every family member, including kids.
4. **Two meeting places.** One just outside your home, one outside your neighborhood.
5. **Listen.** Battery or crank NOAA weather radio for alerts when internet and cell are down.
6. **Go further.** Licensed ham radio can work when cell networks are down.
